Attest : JOSEPH S. HILLS,

Town Clerk.

Annual Report of the Board of Education

OF THE TOWN OF PLAISTOW.

The schools have all been taught in their respective districts as usual, thirty weeks each. The whole number of scholars in town who have attended school the past year is one hundred and sixty-four. Average daily attendance, seventy-three. Perfect attendance, twenty-three. Number of visitors during the year in the four schools, sixty-two. Number of visits by members of the school board, thirty.

A large number of the visitors have been children and people from out of town, but there is a lack of interest on the part of the parents. The School board most earnestly request the parents to visit the schools more, as it creates enthusiasm among the scholars, and shows the teachers that they are interested in their work. Sixty-two visitors for four schools of three terms each, is certainly very small as compared with two years ago, which was two hundred and eight.

The School board takes this opportunity to bring before the citizens of Plaistow the necessity of taking some very important steps toward the improvement of our schools. It can be seen by the report that there has been an increase of scholars from one hundred and thirty-five to one hundred and sixty-four over last year; and in pleasant weather, when the children can all attend, the Center and Westville schools are crowded. Where there are so many children in one school room, under the charge of one teacher, if the smaller ones receive proper attention from the teacher, (which is generally the case) the older scholars have

to be neglected and consequently get dissatisfied with the teacher and school, thereby causing their parents to seek other schooling for them, out of town, when they can afford it, as we have nothing better for them to attend. There are at least twenty of the more advanced scholars, at present in our schools, who ought to be in a graded school, taught by a teacher who would give them all his time, and who is *better qualified* to teach them than the teachers we are obliged to hire to teach an ungraded school. Besides there are a dozen or more scholars who are attending school out of town at present, who would attend here if we had a graded school for them.

The time is not far distant, when we will have to enlarge the seating capacity of our Center school to accommodate all those who wish to attend, and the same condition of affairs exists in our Westville school.

The School board brings this matter before the citizens at this time for reflection, and trusts it will not be long before we will all unite to build a graded school room, which will be an ornament to our town and a place where our children can get a good education, without the expense of sending them out of town to school.
